Nov 3rd 2020 Election Anomalies

Data from Seth Keshel and Lady Draza

Biden – 2,413,568 (54.1%)
Trump – 1,962,430 (44.0%)

Estimating 217k excess votes on a lenient evaluation.

At face value, overwhelming NOVA support for Biden created an even bigger partisan gap, even as the south and southwest became stronger for Trump. Most of the excess votes were piled up 1-2k at a time throughout the southern and eastern portions of VA, with about 73k between Prince William, Loudon, and Fairfax (lenient estimates). The vote stoppage in VA creates suspicion as to whether the state was being prevented from flipping, or just given some buffer room.

If accurate, Trump's margin of loss in VA would have been 5.6%, or 51.8% to 46.2%, a margin of 235k votes. If vote flipping is occurring, then the state could have been down to the wire.

READ THE INTEL SUMMARY FOR THE REST OF THE DETAILS

Best targets for audits: Culpeper, Chesterfield, Fauquier, Frederick, York, Spotsylvania, Stafford Co.

Nov 3rd 2020 Election Anomalies

Data from Seth Keshel and Lady Draza

VIRGINIA
INTEL SUMMARY FOR AUDIT
SETH KESHEL

Ideal Audit Targets: Culpeper, Chesterfield, Fauquier, Frederick, Spotsylvania, York, Stafford Co. (Red counties)

Background: The explanation for the Dem flip of VA is the conversion of bureaucrat-style Republicans in Northern VA into moderate Democrats, and those vote tallies are evident in Arlington, Alexandria, Fairfax, and Loudoun counties. Trump has maxed out the southwest and completely bottom-dropped the Dems in the area and has also improved in some counties he lost thanks to progress with minority voters.

Key Findings: If only excess absentee ballots are considered, and we operate on the assessment that trends of the past 12 years are based in legitimacy, despite Trump's dominance of the south, Biden clearly won the state, but by only 5-6 points as indicated in the cover note (51.8%-46.2%). However, if there is electronic vote flipping, the state is a dead heat.

*Absentee voting in many counties that are in yellow are red are off the charts; Nearly 60% of all ballots were cast absentee. More on that at:
https://www.elections.virginia.gov/resultsreports/registrationturnout-statistics/

*Blue Counties Arlington, Alexandria, and Charlottesville City are not far outside norms.

-Fairfax is AT LEAST 35k heavy, and riddled with absentee votes, 65k leap from 2016 to 2020.

-Virginia Beach was a flip, with a 26k vote gain from Clinton to Biden. Estimate 10k excess.

-Bad Republican counties:
Culpeper – After 2 cycles of fewer D votes, Trump +3k, +Biden +3k, population steady.

Chesterfield – A flip to Dem, after Trump gains +8k in a county he won in 2016 (Biden +26k)

Fauquier – Two consecutive cycles of Dem vote decline, Trump +3k, Biden +5k

Frederick – Two consecutive cycles of Dem decline, Trump booms +4k, Biden +5k, pop. steady

Spotsylvania – Dems stagnant three election in a row as GOP expands 3k per year in 2012/16, Trump +5k in 2020, caught from behind by Biden +10k. Arguably most attractive county for audit, pop. Steady.

Stafford Co. – Dem growth totally of 2k from 2008-16, Biden gain +12k to flip 2016 Trump county. Trump himself gained 4k.

York County – Two consecutive cycles of Dem vote decline, not Trump country but a red county, Biden up 5k in losing column with Trump up modestly.

Excess Biden vote estimates:

*Chesapeake City – 8k
*Chesterfield – 15k
*Culpeper – 3k
*Fairfax – 35k
*Fauquier – 6k
*Frederick – 6k
*Henrico – 12k
*Loudoun – 20k
*Prince William – 18k
*Richmond City – 5k
*Spotsylvania – 8k
*Stafford – 6k
*Virginia Beach City – 10k
*York – 3k

Virginia seemed to have the MOST overall total reductions of any state I have seen so far. There is a very interesting place in the data (line 179) where the report is that Biden jumps from 53.9% to 50.4%, while Trump goes from 44.5% to 44.4%. So, even without looking at the detailed math, that means that the 3rd party percentage took a hit. If the total vote on that line was 4378885, then the increase in Biden's votes to go from 53.9% to 50.4% would have to be 3.5% of that number or 153000 votes in that interval. It is magical the way he managed to do that while the overall total went from 4386617 to 4378885, a reduction of 7732 votes. Maybe that is why the 3rd party percentage took such a hit? But that is ok - he gave them back during the next reporting interval, which reported only 5 new votes.

DEPARTMENT *of* ELECTIONS

OFFICIAL GUIDANCE

Date: October 6, 2020

RE: Election Night Reporting and the Central Absentee Precinct for November 3, 2020 Elections

Under section § 24.2-709 of the Code of Virginia, mail-in ballots postmarked on or before Election Day and received by Friday, November 6 at noon will count toward the election results. The following guidance explains how registrars should report election results from the Central Absentee Precinct (CAP) for the November 3, 2020 elections.

1. On Election Day and Night, localities should process and count as many of the absentee ballots as can reasonably be counted. These ballots will include any received by the CAP and those that are dropped off at polling places on Election Day. There is no requirement that ALL of these ballots have to be processed. Some localities will be able to process and count all of the ballots received through Election Day by the time the night is over. Others will not. **Continue processing ballots until you have finished or until 11:00 p.m., whichever comes first**.
2. Once counting has finished for the night, pull the results tapes and create an initial SOR for the CAP. Report the results as you normally would in VERIS. Follow the closing procedures for your optical scan equipment.
3. You may continue to process ballots on Wednesday, Thursday, and Friday, or any combination. However, you are not required to process incoming ballots until after the deadline to receive ballots at noon on Friday, November 6. This will be a locality-by-locality decision based on the number of ballots received and processing time necessary to complete canvass by Tuesday, November 10.
    a. If you have a machine set aside to scan ballots after Election Day, follow opening procedures, run zero tapes, qualify and feed the ballots. Once all precincts are completed, pull your results.
    b. If you are reusing your machine from CAP to scan ballots after Election Day, you will need to place the Election Day media in Envelope #7. Follow your vendor's instruction on resetting your machine to zero, and insert new CAP media to reopen the voting machine. Follow opening procedures, run zero tapes, qualify and feed the ballots. (If you have not already completed L&A Testing on the media to be used for counting ballots after Election Day, you will need to conduct L&A Testing before scanning ballots.)
4. Once you have completed processing all ballots validly received and cast, pull results tapes from the machines, combine them with the initial SOR from election night, and edit

the SOR to add new columns as necessary to capture the additional results tapes. Edit the CAP results in VERIS to reflect the new totals.

5. Please note that the post-election night CAP will ensure that no locality is reporting 100% results through ENR until the locality has counted all ballots.
6. Please scan or otherwise record received ballots in VERIS as your office receives them. This will ensure that VERIS maintains current, accurate data on the number of ballots returned. ELECT will be displaying this information on our website as part of our election results. Keeping this information current should help reduce the number of calls to your office.
7. CAP ballots counted after Election Day must be processed and counted by members of your CAP team, including the original CAP Chief and Assistant Chief, and at least one other Officer of Election. While the Chief and Assistant Chief must be the original CAP Officers, additional OOEs brought in to assist do not have to have been part of your original CAP team. You may bring in as many teams as necessary to efficiently handle processing and counting. You should consider the availability of these officers when making your schedule to count CAP ballots.
8. Notify political parties and candidates of when you plan to continue processing and counting ballots. Note that the rules for observers/authorized representatives are the same for these additional days as they are for Election Day.

This is the "vote stoppage" that Seth's analysis is referring to — a Commonwealth Board of Elections (CBOE) memo from Oct 6th.

The 2020 Election: SOME "NOT SO FUN" FACTS

87-110%

Estimated Voter Turnout (in certain counties of Virginia depending on which tables of data is provided) Often data has changed over time. Why? Is this due to incompetence or manipula-

Between
33-55%

VA Curbside Voting occurred in Prince William County. (Estimates based on tables from the Virginia Election website.)

69.1%
votes cast absentee

Absentee Votes in District 10 (Clarke, Frederick, Prince William counties, Manassas, Manassas Park, and Winchester). Massive absentee voting occured with no proof of citizenship or VA residen-

Voter ID

Current Laws enacted by the Democrat majority House & Governor in 2020, under the guise of protecting us from COVID, created massive Election fraud. No photo voter ID was needed.

NEW
Voter Laws

Due to new voter laws, if a person couldn't show ID, then they might have been given a provisional ballot. What happened to these ballots? Were they just thrown in with other ballots?

AS OF
11:03 PM

On Election Night Trump was winning 52% to Biden's 46%. That included 3.3 mil of the final 4.4 mil or 75% of the vote. Biden would have had to win 70% + of the remaining votes.

Fractions

Reported votes election night were fractions rather than whole numbers. What happened to one person one vote?

Aproximately
7:15 pm

Between 7:15-7:20 pm on Nov 3, the state was announced for Biden with only 1% of the vote counted. How can that be? Had they counted all the absentee ballots by then?

Where?

Many people say their vote still doesn't show. What happened to their votes?

According to Rasmussen, 51% of Americans believe that cheating occurred in the 2020 Election (Dems 30% Republicans 74% independents 51%)
